Kartikay Gupta

Bengaluru, Karnataka

+917489657221 kartikg052@gmail.com Linkedin GitHub Leetcode

Technical Skills

Programming Languages: C++, Java, Python, Data Structures & Algorithms.
Frameworks/Libraries: React.js, Redux, Node.js, Spring Boot, RESTful APIs, MySQL.
Development Tools & Infrastructure: VS Code, Git, AWS, Docker, System Design.

Experience

Micro1.AI **March 2026 – June 2026**
Full Stack Developer *Remote*

- Worked as a **Full-Stack Developer** delivering **52+ fullstack features** built with **React, Node.js, Express.js, Framer Motion, and Tailwind CSS**; applied AI-assisted development workflows (Gemini, ChatGPT, Claude) to accelerate delivery while ensuring code quality, performance optimization, and responsive UI across interactive applications.

QMC Training Intelligence **September 2025 – March 2026**
Web Development Engineer II *Remote*

- Architected backend **Spring Boot microservices** enabling real-time athlete–coach communication via **WebSockets**; designed the end-to-end architecture and built modular, horizontally scalable services with low-latency message handling.
- Integrated a centralized **OAuth 2.0 Identity Provider (IDP)** using **Spring Boot, Spring Security, and Spring Authorization Server** as Authorization and Resource Server; owned the **LLD** and architecture, enabling secure **SSO** and **JWT-based authentication** across platform services.
- Led frontend development of **TrainingSets**, a B2C multi-sport analytics platform, building scalable UI with **React, JavaScript, Tailwind CSS, and Bootstrap**; delivered **40+ physiological metrics** and **50+ data visualizations** via high-performance **Apache ECharts** dashboards with reusable components and optimized state management.
- Owned **Low-Level Design (LLD)** of **WorkoutStudio and PlanBuilder**, architecting reusable component hierarchies, state flows, and API integration layers for scalability, reducing feature development time by **25%**.

Coriolis Technologies Pvt Ltd **June 2024 – August 2025**
Software Engineer *Pune, India*

- Developed and optimized a client-facing web application using **React and Tailwind CSS**, engineering a modular, reusable, and scalable component architecture; improved page-load performance through **code splitting, lazy loading, memoization, and bundle-size optimization**, validated via **Lighthouse, Chrome DevTools**.
- Built a reusable component library for **7+ internal products** using **React, TypeScript, Shoelace, Tailwind, Storybook**, improving UI consistency and reducing development time.
- Designed marketing landing pages and **12 case-study pages** for the ITSA trade event (Germany) using **HTML, CSS, Bootstrap, JavaScript**.

Projects

Reservet | *React.js, Redux, Node.js, Firebase, MongoDB* | Live

- Built an e-ticketing platform during **Smart India Hackathon** that lets users buy e-tickets for historic places, monuments, and museums in India.
- Worked as **Full-Stack Developer**, designing an MVC architecture with **25 RESTful APIs** that connected the React + Redux frontend with the database; integrated Firebase authentication and responsive SCSS designs.

Education

Jabalpur Engineering College **2020 - 2024**
Bachelor of Technology in Computer Science and Engineering *CGPA 8.24/10*

Achievements

- Participated in **LeetCode** 65+ contests with a peak rating of **1831** and solved **1000+ problems**.
- **Smart India Hackathon** National Finalist 2022 — top 5 team among 125 teams. (Link)
- Secured All India Rank **1604 out of 4992 teams** in **ACM-ICPC** Kanpur Preliminary Round 2022.
