KARTIKAY GUPTA

Pune, Maharashtra | +91 74896 57221 | kartikg052@gmail.com | LinkedIn | GitHub | LeetCode

SUMMARY

Software Engineer with experience building React-based products, Node.js APIs, and Spring Boot microservices. Skilled in frontend architecture, performance optimization, authentication, and data-rich dashboards.

TECHNICAL SKILLS

Languages: C++, Python, Java, JavaScript, TypeScript

Frontend: React.js, Redux, Tailwind CSS, Bootstrap, HTML, CSS, Storybook

Backend & Data: Node.js, Spring Boot, REST APIs, Microservices, MySQL, Redis, Firebase

Tools & Cloud: Git, Docker, AWS, System Design, AI Agents

EXPERIENCE

micro1.ai — Full Stack Developer + AI | *March 2026 – Present* | *Remote*

- Built 48+ features for Feather, an internal platform, using React, Node.js, Redux, Tailwind CSS, and MySQL.
- Improved the platform with responsive UI, reusable task templates and validation, performance enhancements, rate-limiting middleware, and database locking for concurrent requests.
- Created a reusable component library with React, TypeScript, Shoelace, Tailwind CSS, and Storybook to support 7+ internal products and improve UI consistency.

ZaarviQ — Web Development Engineer II | *September 2025 – March 2026* | *Remote*

- Designed Spring Boot microservices and WebSocket-based communication for real-time athlete–coach messaging, with modular services for low-latency message handling.
- Built a centralized OAuth 2.0 identity provider using Spring Security and Spring Authorization Server, enabling SSO and JWT-based authentication across platform services.
- Led frontend development of TrainingSets, a multi-sport analytics platform, delivering 40+ physiological metrics and 50+ visualizations using React and Apache ECharts.
- Owned low-level design for WorkoutStudio and PlanBuilder, defining component hierarchies, state flows, and API integration layers; reduced feature development time by 25%.

Coriolis Technologies Pvt Ltd — Software Engineer | *June 2024 – August 2025* | *Pune, India*

- Built and optimized a client-facing React application with Tailwind CSS and Redux; applied code splitting, lazy loading, memoization, and bundle optimization to improve page performance.
- Developed Node.js REST APIs and MySQL data logic for Gurukul, supporting assignments, feedback, test announcements, student groups, and professor–student requests.
- Created marketing landing pages and 12 case-study pages for the ITSA trade event in Germany using HTML, CSS, Bootstrap, and JavaScript.

PROJECT

Reservet | React.js, Redux, Node.js, Firebase, MongoDB

Built a Smart India Hackathon e-ticketing platform for historic sites, monuments, and museums across India. Designed an MVC-based full-stack architecture with 25 REST APIs and Firebase authentication.

EDUCATION

Jabalpur Engineering College | B.Tech, Computer Science and Engineering | 2020–2024 | CGPA: 8.25/10

ACHIEVEMENTS

- Solved 1,000+ problems on LeetCode; peak contest rating of 1831 across 65+ contests.
- Smart India Hackathon National Finalist, 2022 — top 5 team among 125 teams.
- Secured All India Rank 1604 among 4,992 teams in the ACM-ICPC Kanpur Preliminary Round, 2022.
