Kartikay Gupta

Bengaluru, Karnataka

+917489657221 kartikg052@gmail.com Linkedin GitHub Leetcode

Technical Skills

Programming Languages: C++, JavaScript, Python, Data Structures & Algorithms.
Frameworks/Libraries: React.js, Redux, Node.js, FastAPI, RESTful APIs, MySQL, AWS.
Development Tools & Infrastructure: VS Code, Git, GitHub, Docker, System Design.

Experience

Micro1.AI **March 2026 – June 2026**
AI Trainer *Remote*

- Worked as Trainer/Reviewer on frontend AI artifacts, completing **158+ tasks** involving prompt execution, model evaluation, and feedback using **Gemini (Pro/Flash)**, **ChatGPT (ChatGPT 5.5/ Lumen Alpha)** and **Claude (Sonnet/Opus)**; evaluated interfaces built with React, Node.js, Express.js, Framer Motion, and Tailwind CSS.

QMC Training Intelligence **September 2025 – March 2026**
Web Development Engineer II *Remote*

- Led frontend development of **TrainingSets**, a B2C multi-sport analytics platform, building scalable UI architecture using **React, JavaScript, Tailwind, Bootstrap**; delivered **40+ physiological metrics** and **50+ data visualizations**.
- Developed high-performance dashboards using **Apache ECharts** with reusable component architecture, optimized state management, and efficient rendering of large activity datasets.
- Owned **Low-Level Design (LLD)** of WorkoutStudio and PlanBuilder, architecting reusable component hierarchies, state flows, and API integration layers for scalability and maintainability.

Coriolis Technologies Pvt Ltd **June 2024 – August 2025**
Software Engineer *Pune, India*

- Built a reusable component library for **7+ internal products** using **React, TypeScript, Shoelace, Tailwind, Storybook**, improving UI consistency and reducing development time.
- Designed marketing landing pages and **12 case-study pages** for the ITSA trade event (Germany) using **HTML, CSS, Bootstrap, JavaScript**.
- Created a centralized **Identity Provider (IDP)** system implementing **OAuth 2.0** with Django as Authorization and Resource Server, enabling secure SSO across **10+ products**.

Projects

Reservet | *React.js, Redux, Node.js, Firebase, MongoDB* | Live

- Built an e-ticketing platform during **Smart India Hackathon** that lets users buy e-tickets for historic places, monuments, and museums in India.
- Worked as **Full-Stack Developer**, designing an MVC architecture with **25 RESTful APIs** that connected the React + Redux frontend with the database; integrated Firebase authentication and responsive SCSS designs.

JobTracker | *React.js, React Query, FastAPI, PostgreSQL, Redis, Docker* | Live

- Built a production job-tracking platform with **20+ RESTful APIs** featuring drag-and-drop Kanban, period-over-period analytics, and interview prep — secured with **JWT**.
- Integrated **OpenAI GPT-4o-mini** for resume-to-JD scoring (0–100), 15 tailored interview questions per session, and evidence-based 4-paragraph cover letters; containerized via **multi-stage Docker** with **CI/CD auto-deploys** on every `git push` to Render + Vercel.

Education

Jabalpur Engineering College **2020 - 2024**
Bachelor of Technology in Computer Science and Engineering *CGPA 8.24/10*

Achievements

- Participated in **LeetCode** 65+ contests with a peak rating of **1831** and solved **1000+ problems**.
- **Smart India Hackathon** National Finalist 2022 — top 5 team among 125 teams. (Link)
- Secured All India Rank **1604 out of 4992 teams** in **ACM-ICPC** Kanpur Preliminary Round 2022.
- Core member of **Karwaan Society** for 1 year, guiding school students in competition prep.
- **Open Source** contributor in Hacktoberfest 2021.
